REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the references of record neither reveal nor render obvious the recited combination including a digital to analog converter, hereafter DAC, having multiplexers and voltage dividers coupled in the claimed manner.

U.S. Patent 6,664,909 to Hyde et al discloses DACs trimmed by p-type field effect transistors, hereafter FETs, having tunneling junctions. U.S. Patent 6,424,281 to Liaw et al provides a DAC having a plurality of voltage dividers [20/21] coupled to programmable switches [11 / 12], but does not disclose an input binary word source. U.S. Patent 6,118,264 to Capici provides a voltage reference by means of a band-gap regulator circuit. U.S. Patent 5,469,163 to Taddiken uses multiple resonant tunneling circuits for range-4 to binary conversion. U.S. Patent 4,064,448 to Eatock describes a band-gap voltage regulator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick G. Wamsley whose telephone number is (571) 272-1814. The official facsimile number is (703) 872-9306. An alternate facsimile number, (571) 273-1814, should only be used for unofficial documents.

Patrick G. Wamsley
